Manufacturers Specifications

A MESSAGE TO OUR CUSTOMERS

Thank you for choosing a Flare Fire. Because of the unique qualities of our fires, we have developed these manufacturer specifications so you know what to expect and how to install your Flare Fire. Also included are the component weights, dimensions and so on.

Each Martello Flare Fire comes with a 5 year limited warranty and our commitment to resolve any issues.

To see the warranty, visit https://flarefires.com/martello-warranty/

Any questions, please just drop us a line.

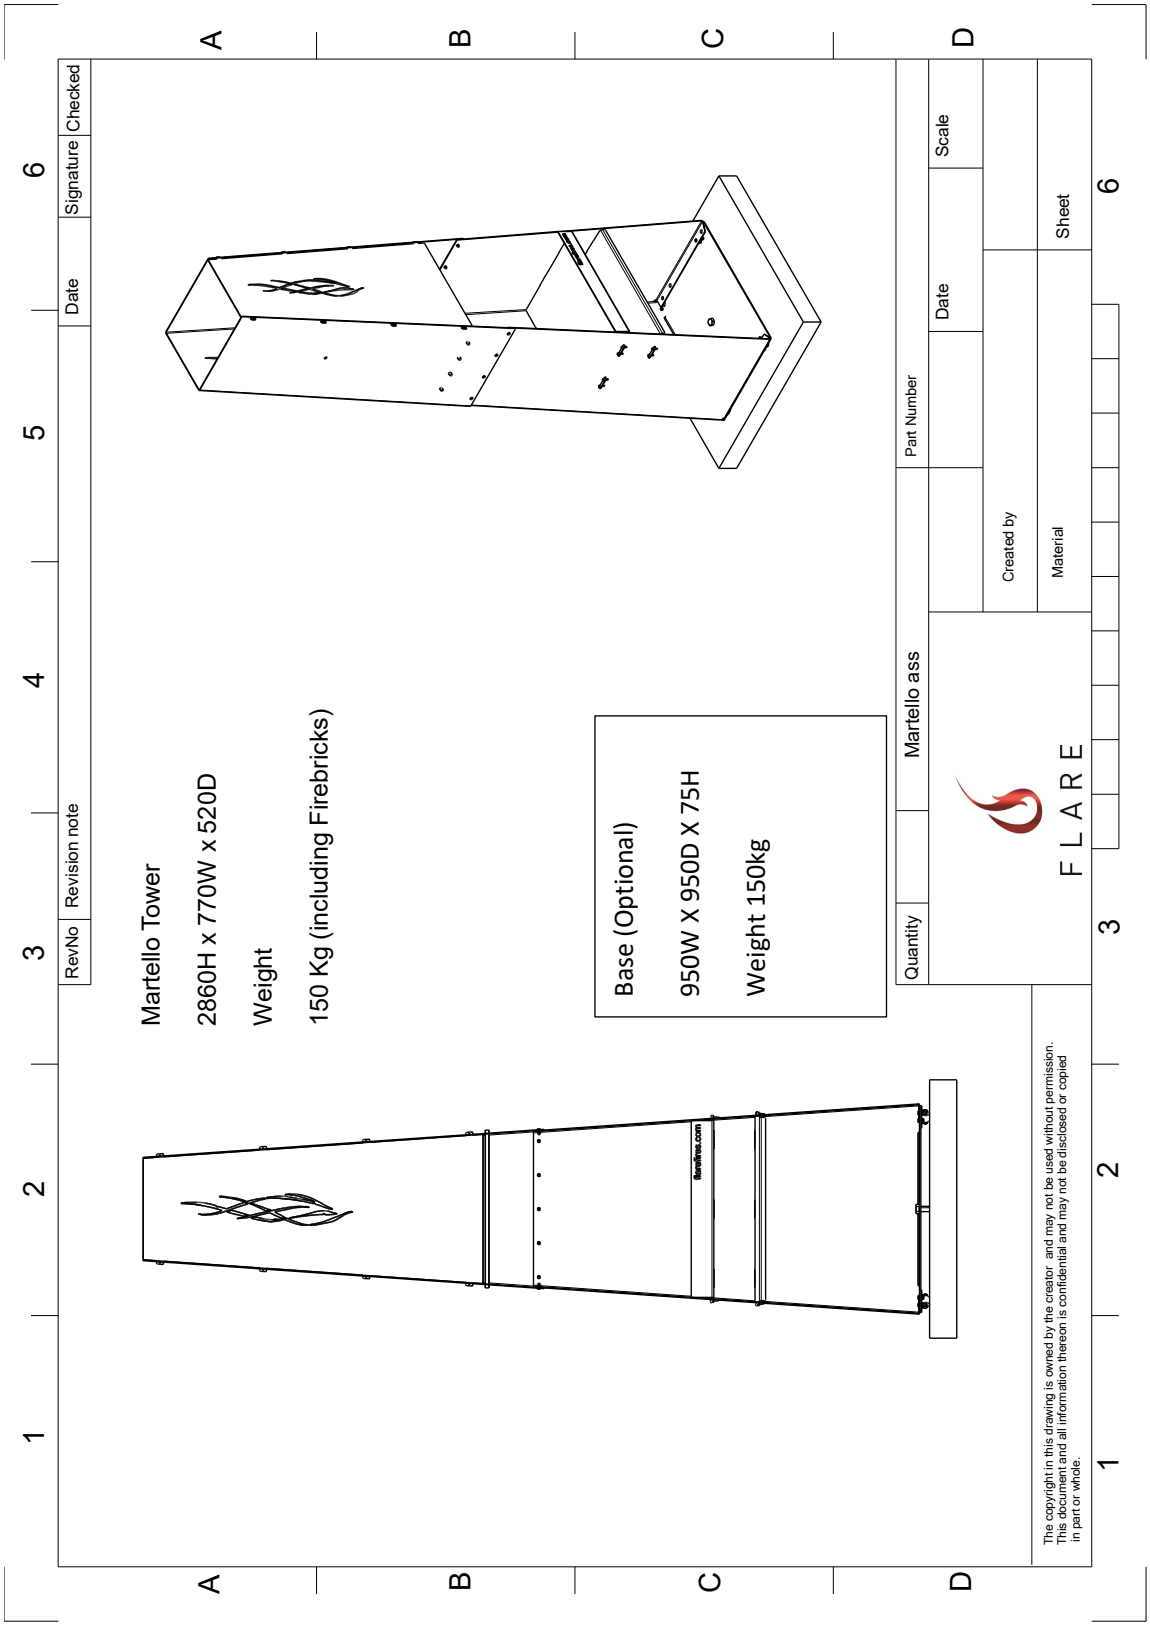
WEIGHTS AND DIMENSIONS



INSTALLING YOUR MARTELLO TOWER

No Rotating Base

If you have chosen the option without a rotating base you will need to affix your Martello Tower to the surface on which you are placing your fire with the supplied screws. This is to ensure your fire does not fall over in a wind.

Concrete – Use 4 X M12 X 80 Concrete Screws (supplied)
Wood – Use 4 X M12 X 40 Coach Screws (supplied)

Please make sure your Martello Tower is installed onto a level stable surface.

With Rotating Base
If you have chosen the rotating base option, affix your Martello Tower to the concrete base with the 20mm bolt supplied.

Please make sure the concrete base is placed on level stable ground.

The concrete base can be set into the ground.

SELF ASSEMBLY

Your Flare Martello Tower can come assembled, but must be picked up from a freight depot. This is because the assembled product is too big for most delivery vehicles to deliver to your door. For pickup you will need a trailer that can carry something 2.9m long.

If you could like it delivered to your door, you can assemble the Martello Tower yourself, assembly instructions can be obtained from Flare Fires.

Both options exclude freight. We will give you a freight cost when you place your order.

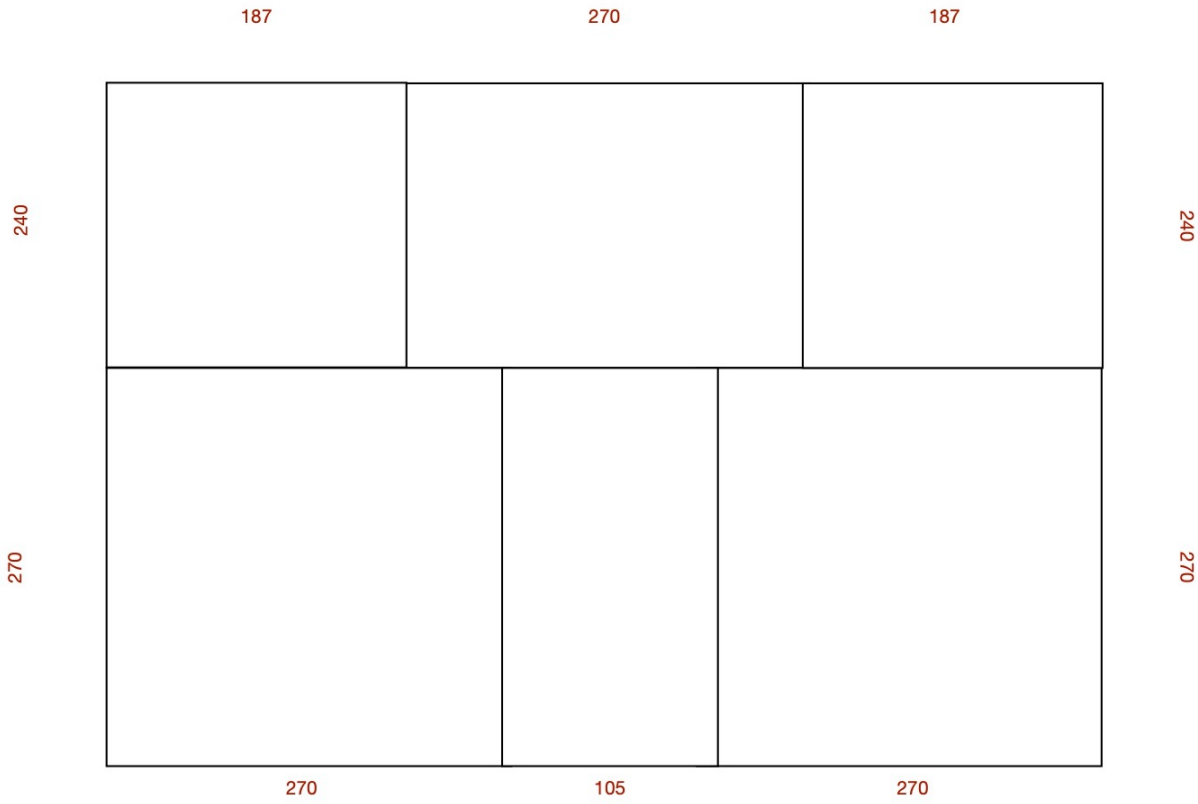
BRICK INSTALLATION PLAN

The Tools you may need

1. A Rubber Mallet
2. A Tape Measure (to check dimensions if needed)

Instructions
Simply install one layer of bricks as per the below diagram.



Congratulations on your successful installation of the Flare Martello Outdoor Fireplace.
Please contact us if you have any questions.
