

## 5 YEAR LIMITED WARRANTY

The Flare Martello Tower comes with a 5 year limited warranty. The limitations are detailed below:

**Rust Patina** - The Martello Tower is made from Weathering steel, often referred to by the genericised trademark COR-TEN.

In suitable environments weathering steel forms an adherent protective rust 'patina', that inhibits further corrosion.

As weathering steel forms a natural rust patina, your Martello Tower may come with some rust already showing. This can be as a result of water contact during storage and transport or as a result of the general aging of the steel.

**Structural Integrity** – Despite the rust patina each Martello Tower is guaranteed to be structurally sound for 5 years. If the fire was assembled by the customer, the warranty is subject to the fire being assembled as per the assemble instructions in this document.

**Bowing** – Due to heat, your Martello Tower may bow in places. Such bowing cannot be removed and is not covered by the warranty.

**Wedges** – The small wedges used in the joins may break within the 5 year period. If this occurs, Flare will replace the wedges only, as long as this breakage occurred within 5 years of purchase.

**Fire Falling Over** – For the Martello Tower not to fall over, it must be affixed appropriately to the surface on which it stands, using the supplied fixings. This surface is to be level and stable. Instructions for affixing to the ground follow in this document. This warranty specifically excludes any damage to the Martello Tower or any other property caused from falling over. This applies whether affixed properly or not.

**Fire Bricks** – Flare Fires will replace fire bricks, no questions asked, during the lifetime of the fire.

**Accessories** – All Flare Fire Stainless Steel Accessories come with a 5 year full replacement warranty for failure to perform. Other accessories come with a 12 month warranty.
